Folks, it's time to let the Public Service Commission know that you appreciate their determination to talk about solar energy. The PSC has been asked to delay its Sept 12th workshop on solar and net metering until possibly the new year, to allow an advisory committee to complete its recommendations on how to account for future solar growth. While that work is important, we think it's necessary to continue the public discussion on how existing rules can be improved to allow for limited amounts of solar competition right now. Many other states have already taken these modest steps.

If you agree, please contact Jocelyn.boyd@psc.sc.gov today and ask the PSC to hold its Sept 12th public hearing on net metering (PSC Docket #2005-385-E). You should also copy these individuals who are on the docket email list: davido@sunstoresolar.com; pmlgrnlw@yahoo.com; brian.franklin@duke-energy.com; timika.shafeek-horton@duke-energy.com; libbysmith@comcast.net; nsedwar@regstaff.sc.gov; shudson@regstaff.sc.gov; chad.burgess@scana.com.

I got the above email message and I have no problem in you getting additional information before you make up you discuss or vote on this matter.
